

Troy Rowland - BIG BANG THEORY

INT. COFFEESHOP - DAY

JANEY and RAJ sit at a coffeeshop.

JANEY

I'm having a hard time figuring out this out.

RAJ

The symbol on the left is an infinite sum, while the one on the right is an infinite product.

JANEY

Oh, please. I've been solving Euler Product Formulas since I was 12. I'm talking about Limu.

RAJ

The Dromaius novaehollandiae- it's is the second-largest living bird after the ostrich. Duh.

JANEY

Not the emu- Limu. This horrific seaweed drink that I ordered and have been forcing myself to drink for the past half hour.

RAJ

Yeah, I just thought you ordered sadness in a green, liquid form.

JANEY

It doesn't make any sense to me. But neither does this. I mean, look at us falling in love!

RAJ

Is that what's happening? Because the odds of you falling in love with me are- well, crazy.

JANEY

Like the one time I used a Continuum Hypothesis on a Facotral! What was I thinking?

RAJ

I've done the same thing! But to be honest, it was a Saturday night. I had just switched to soy. Wild and crazy.

Troy Rowland - BIG BANG THEORY

JANEY

Yeah, just like our love. But this-
(looks at drink), makes me feel
like I'm drinking elf pee. (beat)
So! Should I go for some soy milk
even though it's a Thursday? #wild,
#crazy?

RAJ

#yes.
